

The economic impact of research and technology (R&T) parks is **significant**. The parks house home grown start-up companies and born global export-ready companies. **72%** of companies believe that locating in a R&T park improves their ability to attract and retain highly skilled labour... and there's more... **75% have accelerators** and services that are helping start-ups. With over 65,000 jobs generating **\$4.3 billion** in GDP, R&T parks are accelerating the national knowledge economy.
